Engineering Controls: Use local exhaust ventilation to maintain air concentrations of vapors and fumes below occupational exposure standards.

Special Engineering Control Needs: Not applicable

Respiratory Protection: Where risk assessment shows air-purifying respirators are appropriate, use a face mask as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face respirator with multi-purpose combination (USA) or ABEK (EN 14387) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (USA) or CEN (EU).

Eye Protection: Use appropriate fitting safety goggles. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (USA) or EN 166 (EU)

Body Protection: Where risk assessment shows body protection is appropriate, use a worker coat, laboratory coat, or rubber apron. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers.
