

ANTI-BORAX STABLEWELD

FORGE WELDING FLUX POWDER

- **Anti-Borax Stableweld** is a metal-bearing forge welding flux.
- **Anti-Borax Stableweld** is ideal for farrier and forge applications.

DESCRIPTION

Anti-Borax Stableweld is a tan powder with grey chips. **Anti-Borax Stableweld** has a lower (12%) metal loading than the Anti-Borax EZ flux. This forge flux is used in forge applications that require a lower metal concentration in the flux. **Anti-Borax Stableweld** works like Anti-Borax EZ in most forge welding processes, and can be used in a wide variety of applications.

PHYSICAL PROPERTIES

Form	Powder
Color	Tan with Grey Chips
Volatile Content	Less than 0.5%
Fluoride Content	None
Flash Point	None

THIS PRODUCT IS RoHS COMPLIANT

SAFETY PRECAUTIONS

Anti-Borax Stableweld does not contain fluorides, but does contain silica powder and should be handled with care and the normal precautions taken when working with chemical products.

When working with **Anti-Borax Stableweld** adequate exhaust ventilation must be present to avoid breathing the fumes that may come from the inorganic borates. Avoid contact with eyes, skin, and mucous membranes. Always wear NIOSH approved safety equipment when working with chemicals. In case of eye contact, flush freely with water and call a physician immediately. Store away from heat, moisture and water.

Refer to Material Safety Data Sheet (MSDS) for additional safety information.

Anti-Borax Stableweld has a two (2) year shelf life.

Superior manufactures quality fluxes. Our business is solving problems.
